STAYWELCOME PRO

Quick-start guide for vacation-rental hosts

An editable guest experience guide designed to help you organize the information guests need before and during their stay.

1. Open the product

Extract the ZIP archive and open **index.html** in a current browser such as Chrome, Edge, Firefox or Safari. The guide works locally and does not require an account or subscription.

2. Choose the guest language

Use the language selector at the top of the page. The interface is available in English, Italian, German, French and Spanish. This changes interface labels and sample guidance; it does not translate your own property text.

3. Personalize every chapter

Select **Edit guide**. Replace the sample text and fill in the property name, host details, address, check-in and check-out times, amenities, Wi-Fi, house rules, access instructions, local recommendations, transport, emergency details and safety information. Finish editing to save.

4. Save a backup

Choose **Export backup** and keep the downloaded JSON file in a secure location. Saved changes stay in the current browser on the current device; they do not sync automatically. Use **Import backup** to restore your information on another device or browser.

5. Print or create a PDF

Choose **Print / Save PDF**. In the browser print dialog select A4 and 'Save as PDF'. Review the preview before sharing or printing. The print layout includes all chapters.

6. Share a digital guide

To provide guests with a public link, upload index.html to a website or hosting service you control. Hosting is not included in this product. Test the public link on a phone before sending it to guests.

7. Privacy and security

Do not publish active door codes, key-safe combinations, private phone numbers or other sensitive access information on a public page. Share temporary access details privately with confirmed guests and rotate codes between stays. Do not place personal or confidential data in a public QR code.

8. Host verification checklist

- Confirm the full property address and the correct local emergency number.
- Check every emergency, medical, transport and local recommendation detail.
- Verify house rules against applicable law, building rules and rental terms.
- Check that the described safety equipment is present and working.
- Confirm opening hours, prices and seasonal information before sharing.
- Open the guide on a phone and test every chapter and link you add.
- Remove all placeholder text and sample instructions.

Important: STAYWELCOME PRO is a communication template, not legal, medical, fire-safety or property-management advice. The host is responsible for accuracy, lawful use and local compliance.
